PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience building full-stack web and mobile products, from backend APIs and databases to production Flutter and React applications. Comfortable working across the stack: Python/Django and Node.js/Express on the backend, React/TypeScript/Vue.js on the web, and Flutter/Dart for iOS and Android, and applying Clean Architecture principles to keep codebases maintainable and testable. Experienced with Docker-based CI/CD pipelines, REST/WebSocket API design, and delivering features for products used in the fintech, govtech, fleet-management, and legal-tech domains. Adaptable, detail-oriented, and used to working in small, cross-functional engineering teams and on independent projects alike.

CORE TECHNICAL SKILLS

Mobile Development: Flutter/Dart, Android (Java/Kotlin), iOS

Architecture & State Management: Clean Architecture, BLoC, Cubit, Freezed, dependency injection (get_it, injectable), repository pattern, Redux, Vuex, Pinia

Networking & Integrations: REST APIs, WebSockets, Dio, Retrofit2, JSON, authentication and token management (JWT)

Data Storage: SQLite, Hive, SharedPreferences, Flutter Secure Storage, MongoDB, PostgreSQL, MS SQL Server, MySQL, Firebase (Realtime Database, Auth)

Frontend & Web: Flutter, React, TypeScript, JavaScript, Vue.js (Vue3, Vite), Angular, Redux, GoRouter, TailwindCSS, Material UI, Bootstrap, Axios

Backend: Node.js, Express.js, Python, Django, Django REST Framework

Infrastructure & DevOps: Docker, Docker Compose, Nginx, Git, GitHub, GitLab, Gitea, CI/CD (GitHub Actions, CircleCI, Jenkins), multistage builds, environment management (dev/qa/prod)

Testing & Quality: Unit & integration testing, Mockito, Faker, Jest, Vitest, React Testing Library, SonarQube, ESLint/Prettier, code review

Other Tools: ML Kit (on-device OCR), flutter_map, geocoding, camera, in_app_update, Postman, Jira, Confluence, Figma, Agile/Scrum, mobile app store deployment (Google Play, App Store, App Gallery)

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2023 - Present

PumpPay (Pty) Ltd — South Africa | Remote

- Develop and maintain the PumpPay fleet-management platform: a Django REST Framework backend, a Flutter web dashboard (fleet/merchant portals), and Flutter mobile apps for drivers and forecourt operators, published on Google Play, App Store and App Gallery; the public marketing site is built separately in React.
- Build and maintain Docker-based CI/CD pipelines for building, tagging, and releasing the Flutter applications.
- Apply Clean Architecture, BLoC/Cubit state management, Freezed, and dependency injection (get_it/injectable) to support maintainable and scalable development.
- Integrate REST APIs, WebSocket connections, authentication services and secure local data storage (Hive, Flutter Secure Storage).
- Work with payment-related functionality, transaction flows, maps and location services (flutter_map, geocoding), document processing (ML Kit) and notifications.
- Write unit and integration tests (Mockito, Faker) to maintain code quality across releases.
- Contribute across related products within the same engineering group, including a Django/React fintech platform (TeamFu), a Flutter mobile wallet (Zarply).
- Participate in technical planning, code reviews, troubleshooting, application releases and ongoing product maintenance.
- Work directly with product and design stakeholders to scope, implement, and ship features end to end.

Software Engineer (previously Student Intern)

Oct 2019 - Jul 2023

IBA Group — Gomel, Belarus

- Delivered frontend and full-stack features for external and internal client projects within a large, established outsourcing company.
- Built and maintained frontend services for a national digital-government platform (React, Redux, TypeScript), giving citizens and businesses access to public services such as bill payments, licensing, and appointments; integrated REST APIs, wrote unit tests, and used the company's internal component library.
- Reviewed and triaged pull requests, wrote internal technical documentation, and collaborated with cross-functional teams using Jira and Confluence in an Agile workflow.
- Progressed from Student Intern (Oct 2019 - Jun 2021) to Software Engineer (Jul 2021 - Nov 2023) over the course of the engagement.

Personal Projects, University & Independent Learning

2017 - 2024

- Designed and built full-stack web applications (Node.js, Express, MongoDB, React) for personal ventures.
- Developed and published a Flutter mobile application to the Google Play Store, handling the app end to end from UI to release.
- Built assorted personal/open-source tools, including a TypeScript break-even calculator (core library, CLI, and HTTP service), a document scanning app using on-device OCR and ML Kit, and a stock-tracking application.
- Designed and built a full-stack university scheduling system end to end: a React/TypeScript web client, a React Native mobile app (iOS/Android), a Node.js/Express backend, and Firebase Realtime Database/MongoDB for live and archived data.
- Built an Android application (Kotlin) that helped users identify medication equivalents across countries by name or active substance, integrating a REST API via Retrofit2.
- Built a desktop data-management application (Electron, React, Material UI) backed by MS SQL Server, including reporting, Excel export, and search functionality.

EDUCATION

Master's Degree in Information Technology and Programming

Sep 2021 - May 2023

Francisk Skorina Gomel State University — Gomel, Belarus

Bachelor's Degree in Software Engineering

Sep 2017 - Jul 2021

Francisk Skorina Gomel State University — Gomel, Belarus

CERTIFICATIONS & TRAINING

"Commercial Software Development — Front-end" remote training program

Jun 2023 - Jul 2023

Itransition — Gomel, Belarus

Internal IBA Group training courses: Git, JavaScript, React, Angular, Angular Advanced, Node.js, Python 3, Vue3

Oct 2019 - Jun 2021

IBA Group — Gomel, Belarus

LANGUAGES

English • Belarusian • Russian • Ukrainian

ADDITIONAL INFORMATION

Nationality: Belarusian

Current residence: Batumi, Georgia

Residence status: Temporary Residence Permit in Georgia

Employment format: Remote, Hybrid, or Office; open to relocation

Supporting documents: Available upon request
